K S PHANINDRA

Bangalore, KA | phanindra.k.s.2005@gmail.com | linkedin.com/in/ksphanindra | github.com/phanindraks2005

EDUCATION

BMS College of Engineering Bengaluru
B.Tech in Computer Science Engineering | CGPA: 6.88
2023 – 2027

Areas of interest: Full-Stack Web Development, AI-Integrated Applications, Database Management Systems, Software Development

WORK EXPERIENCE

Utsav — Cultural Fest, BMSCE Bengaluru
Junior Coordinator, Volunteering Committee | 2025

- Led a team of 12 volunteers to ensure smooth execution of the cultural fest across all event areas.
- Coordinated task allocation, managed volunteer schedules, and handled on-ground logistics throughout the fest.

PhaseShift — Technical Fest, BMSCE Bengaluru
Volunteer | 2025

- Contributed to technical fest operations and supported event management activities.

Deathscapes — College Event, BMSCE Bengaluru
Technical Team Member | 2025

- Worked in the technical execution team, handling technical setup and coordination.

SKILLS

Languages & Core: C, C++, Java, Python, JavaScript, TypeScript, Dart, HTML, CSS, SQL
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Flutter, Tailwind CSS, Three.js, Framer Motion, NumPy, Pandas, Scikit-learn
Databases & Tools: PostgreSQL (Supabase), MySQL, MongoDB, SQLite, REST APIs, Git, GitHub, Vercel, Render
CS Fundamentals: DSA, DBMS, Operating Systems, Computer Networks, OOP, AI
Soft Skills: Problem-solving, Communication, Teamwork, Time Management, Adaptability

PROJECT EXPERIENCE

MediVault — Family Health Records & AI Assistant GitHub | Live
Next.js, TypeScript, Supabase (PostgreSQL), Gemini API, Tailwind CSS, Vercel

- Built and deployed a family health records app that reads prescription photos with Gemini OCR and organises each member's medicines, records and vaccinations on one calendar.
- Secured medical data with PostgreSQL Row-Level Security, a private per-user storage bucket, token-verified API routes and per-user AI rate limits; found and fixed a cross-account file-access vulnerability during a QA audit.
- Built a QR emergency card that paramedics can scan without logging in, using hashed revocable tokens, expiry dates, rate limiting and a field allowlist so only emergency details are exposed.
- Added Doc, an AI assistant that answers questions from a family's records, plus symptom triage and a drug-interaction checker; raised mobile Lighthouse performance from 52 to 95+.

Stride — Full-Stack Fitness & Habit Tracking Platform GitHub | Live
Next.js, JavaScript, Supabase (PostgreSQL), Gemini API, Framer Motion, Recharts, Vercel

- Built and deployed a full-stack fitness and habit tracking web app with workout logging, custom trackers, streaks, notes, and visual progress charts.
- Integrated Libra, an in-app AI copilot on the Gemini API with tool-calling that logs activity, creates trackers, and generates meal and workout plans from natural conversation.
- Secured multi-user data with Supabase Auth and PostgreSQL Row-Level Security policies, enforcing per-user data isolation on every table.

RoadSense — Road Safety & Speed-Bump Detection App GitHub
Flutter, Dart, FastAPI, Python, Scikit-learn, SQLite, Render

- Built a Flutter mobile app with a live map, GPS tracking, speed-bump markers, proximity warnings, and CSV data export.
- Developed a FastAPI backend serving a Scikit-learn speed-bump detection model with SQLite storage, deployed on Render.
